INTERNSHIP

Computer Science, Web Development | Spring 2015

smithHOUSE is a young Phoenix-based creative agency that focuses on branding, web, and mobile. We enjoy the sweet spot that is in the intersection of design, technology, and business.

Computer Science / Web Development Internship

- Wordpress
- CSS3, HTML5, JavaScript
- Twitter Bootstrap
- Server Configuration and Management
- Mobile App Development
- Eager to learn about marketing, design, and business.

You will fit in here if...

- You take pride in your work.
- You want to see your talent grow.
- You are outgoing and like to meet new people.
- You like to bring creative solutions to complicated problems.

Why smithHOUSE?

- Our company culture is creative, positive, and energetic. We also like to laugh
- Work with clients. Learn how to host meetings, present ideas, and gather feedback.
- Collaborate with remote team members.
- Get experience in an entrepreneurship / startup environment. In addition to client workwe will incubate ideas into new companies.

We want you to be successful. We want your internship here to bring life to your college coursework. We want you to have a huge boost on your resume. We want you to go off and do great things in the world—like work with us full time once you graduate.
